Research Interests

My main area of interest is large-scale numerical optimization methods for deep learning, with a particular focus on Riemannian, bilevel, and non-Euclidean methods. I also have a strong interest in implicit biases in optimization, feature-learning mechanisms in deep neural networks, and Hessian-free methods. On the applications side, my main interest is the scientific computing acceleration of structured optimization problems.

Education

- **Gran Sasso Science Institute**, PhD program in Applied Mathematics. 11/2022-11/2026
 - Four-year PNRR scholarship on neural network compression and energy-efficient optimization methods for deep learning problems.During these years, I had the occasion to lead multiple research projects, which, as shown below, resulted in different publications in top-tier conferences.
- Scientific Advisor: Prof. Dr. Francesco Tudisco, in collaboration with Dr. Gianluca Ceruti.
- Pillar courses in: Numerical Analysis, Computational fluid dynamics, Statistical mechanics, and PDEs.
- **University of Padova**, MSc in Data Science (Mathematics of Data Science program). 01/2021 - 09/2022
 - Thesis title: "Dynamical low-rank training of neural networks", advised by Prof. Dr. Francesco Rinaldi and Prof. Dr. Francesco Tudisco.
 - Pillar courses: Numerical methods, high-dimensional statistics, optimization for data science, deep and machine learning.
- **University of Padova**, BSc in Mathematics. 10/2016 - 12/2020
 - Thesis title: "Modeling attention dynamics in social networks", advised by Prof. Dr. Marco Formentin.

Experience

- **Visiting period**, University of Edinburgh, UK. 09/2024 - 01/2025
- Working on implicit biases of common optimization methods in deep learning and Riemannian methods for large-scale optimization.
- **Visiting period**, University of Innsbruck, Austria. 04/2024 - 07/2024
- Investigating the efficiency of classical time-dependent variational principles coupled with neural network representations to approximate the solution of evolutionary PDEs for plasma physics problems.
- **Master thesis internship**, Gran Sasso Science Institute, Italy. 01/2022 - 06/2022
- Working on variational methods to efficiently train low-rank compressed neural networks.

Publications

- **Provable Emergence of Deep Neural Collapse and Low-Rank Bias in L^2 -Regularized Nonlinear Networks** [↗](#) TMLR 2026
- *E. Zangrando*, P. Deidda, S. Brugiapaglia, N. Guglielmi, and F. Tudisco
- **Neural-HSS: Hierarchical Semi-Separable Neural PDE Solver** [↗](#) ICML 2026
- P. Sittoni*, *E. Zangrando**, A.A. Casulli, N. Guglielmi, and F. Tudisco
- **GeoLoRA: Geometric integration for parameter efficient fine-tuning** [↗](#) ICLR 2025
- S. Schotthöfer *E. Zangrando*, G. Ceruti, F. Tudisco, and J. Kusch
- **dEBORA: Efficient Bilevel Optimization-based low-Rank Adaptation** [↗](#) ICLR 2025
- *E. Zangrando*, S. Venturini, F. Rinaldi, and F. Tudisco

Robust low-rank training via approximate orthonormal constraints ↗	NeurIPS 2023
D. Savostianova, <i>E. Zangrando</i> , G. Ceruti, and F. Tudisco	
HIJACK: Learning-based Strategies for Sound Classification Robustness to Adversarial Noise ↗	IEEE SMARTCOMP 2023
D. Sweet, <i>E. Zangrando</i> , F. Meneghello	
Low-rank lottery tickets: finding efficient low-rank neural networks via matrix differential equations ↗	NeurIPS 2022
S. Schotthöfer*, <i>E. Zangrando*</i> , J. Kusch, G. Ceruti, and F. Tudisco	

Preprints

Constrained Variable Projection for Structured Problems ↗	ArXiv 2026
<i>E. Zangrando</i> , S. Venturini, F. Rinaldi, F. Tudisco	
Stiefel-AdamW: Geometry-Aware AdamW for Linear Factorization Blocks ↗	ArXiv 2026
<i>E. Zangrando</i> , M. Sutti, F. Tudisco	
Low-rank adversarial PGD attack ↗	ArXiv 2024
D. Savostianova, <i>E. Zangrando</i> , and F. Tudisco	

Professional Service

- ICML 2026 gold reviewer, NeurIPS 2025 top reviewer, NeurIPS 2022 and NeurIPS 2023 scholar awards.
- Reviewing for ICML, ICLR, NeurIPS, AISTATS since 2023. Reviewer of TMLR since 2026. Reviewed for AAAI, Scientific Reports, Neurocomputing, Annals of Statistics and SIAM Journal on Optimization.
- Organization of events: MS in SIAMLA (Paris, May 2024), MS in YAMC (Padua, September 2025).

Technologies

Languages: Python, R, Wolfram Mathematica, Matlab. Good knowledge of LaTeX.

Technologies: Torch, JaX, Keras, Tensorflow and TensorFlow Probability, Bash, HPC, Git.

Scientific communication: talks, seminars and posters

- "Low-rank training of tensor structured neural networks", SciCADE conference, Edinburgh, June 2026.
- "Dynamical low-rank training of neural networks", SIAM Optimization conference, Edinburgh, June 2026.
- "Hierarchical structures in neural PDE solvers", Advanced Numerical Methods for Parametric PDEs, L'Aquila, February 2026.
- "Emergence and Stability of Deep Neural Collapse", Mathematics of data driven models, L'Aquila, January 2026.
- "Emergence and Stability of Deep Neural Collapse", YAMC, Padua, September 2025.
- "GeoLoRA: Geometric integration for parameter efficient fine-tuning", ICLR poster presentation, Singapore, April 2025.
- "dEBORA: Efficient bilevel optimization-based low-rank adaptation", ICLR poster presentation, Singapore, April 2025.
- "Deep learning for model order reduction in partial differential equations", GIMC-SIMAI young workshop, Naples, July 2024.
- "Online low-rank neural network compression", GIMC-SIMAI young workshop, Naples, July 2024.
- "Dynamical low-rank training of neural networks", SIAM Conference on Applied Linear Algebra (LA24), Paris, May 2024.
- "Robust low-rank training via approximate orthonormal constraints", NeurIPS poster presentation, New Orleans (USA), December 2023.
- "Dynamical low-rank training of neural networks", 2gg Algebra Lineare Numerica, L'Aquila, May 2023.
- "Low-rank lottery tickets: finding efficient low-rank neural networks via matrix differential equations", NeurIPS poster presentation, New Orleans (USA), December 2022.
- "Dynamical low-rank training of neural networks", Sciences - Computing - Data - Mathematics Seminar (SCDM), Karlsruhe Institute of Technology (Germany), November 2022.
- "Dynamical low-rank training of neural networks", GIMC-SIMAI young workshop, University of Pavia (Italy), September 2022.
